Predicted amino acid sequence is indentical to that of the H.Influenzae PC protein (Nelson et al., Infect Immun 56, 128-134, 1980). Protein sequence is also 60% homologous to the E.coli pal gene product (Chem and Henning, Eur. J. Biochem. 163, 73-77, 1988).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        1 bp upstream of BglII site

The H. influenzae sequence has been updated by R. Fleischmann. New database matches have been assigned, product names have been improved, and a number of frame shifts have been corrected. We gratefully acknowledge the work of Tatusov et. al. We have incorporated their annotation into the /notes fields of the corresponding H. influenzae genes
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Tatusov,R.L., Mushegian,A.R., Bork,P., Brown,N.P., Borodovsky,M., Rudd,K.E. and Koonin,E.V. Metabolism and evolution of Haemophilus influenzae whole-genome comparison with Escherichia coli Curr. Biol. 6 (3), 279-291 (1996)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Haemophilus influenzae
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   U32722.1 GI:1573348
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Whole-genome random sequencing and assembly of Haemophilus
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Haemophilus influenzae
                                                                                                                                            Medical Center Dr. Rockville, MD 20850, USA
The whole genome was shifted by 588 nucleotides for a new start
on Sep 30, 1996 this sequence version replaced gi:1221050.
